

STRATEGIC PARTNERSHIP BETWEEN TITAN AVIATION AND AL SHIRAWI ENTERPRISES IN UAE

TITAN AVIATION is very proud to announce the signing of a strategic agreement with AL SHIRAWI ENTERPRISES in United Arab Emirates, with a common goal: the deployment of electric refuelling and electric vehicles in the region.

2 companies and 1 shared vision: “to lead airports decarbonization thanks to zero emission vehicles and pioneering electric refuelling technologies in the UAE and beyond.”

TITAN AVIATION, French global manufacturer of aircraft refuelling vehicles has joined forces with AL SHIRAWI ENTERPRISES to deploy innovative zero emission solutions in the Middle East region and reduce the environmental impact of ground support operations. TITAN AVIATION is at the forefront of electric refuelling technologies having started development over 4 years ago, with units already in operation with international oil companies and into-plane operators.

AL SHIRAWI ENTERPRISES is a long-term key player in the support of refuelling vehicles in the UAE but more than that, the well-known company is recognized as leader in the distribution of trucks across the Emirates. AL SHIRAWI ENTERPRISES also takes pride in its sophisticated ‘after-sales’ services, which ensure maximum customer satisfaction in the various sector in which it operates.

The consortium of companies is now ready for deploying their forces to offer zero emissions turnkey aircraft solutions in the region from hybridization of existing refuelling units, electric chassis swap and refurbishment to delivery of brand-new hybrid or full electric refuellers (including dispensers). Supporting sustainable airport operations, zero emission refuelling is now a proven reality.

ABOUT US TITAN AVIATION, a subsidiary of the POURPRIX GROUP, has been designing and manufacturing civil and military refuelling solutions for over 60 years. With over 6,000 pieces of equipment in operation, our products and services are recognised by the world’s leading oil companies, refuelling operators and armed forces. Over 80% of the company’s turnover comes from exports and around 30% from the defence sector. We work closely with our customers to develop specific solutions. We offer a wide range of products to meet all operators’ needs: all-capacity aircraft refuellers, hydrant dispensers, refuelling stations, fuel depots, etc.
